# Energy performance certificate (EPC)

Edgehill Hawkhurst Road CRANBROOK TN17 3QD	Energy rating <b>D</b>	Valid until: <b>13 January 2036</b>
		Certificate number: <b>0535-3057-3209-8836-8200</b>

**Property type** Detached house

**Total floor area** 203 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions](#) (<https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance>).

## Energy rating and score

This property's energy rating is D. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

## Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Wall	Timber frame, with additional insulation	Good
Roof	Pitched, 200 mm loft insulation	Good
Window	Fully double glazed	Poor

Feature	Description	Rating
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	Electric immersion, standard tariff	Average
Lighting	Good lighting efficiency	Good
Floor	Solid, no insulation (assumed)	N/A
Floor	Suspended, no insulation (assumed)	N/A
Air tightness	(not tested)	N/A
Secondary heating	Room heaters, wood logs	N/A

## Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO<sub>2</sub>. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

- Biomass secondary heating

## Primary energy use

The primary energy use for this property per year is 224 kilowatt hours per square metre (kWh/m<sup>2</sup>).

### ► About primary energy use

## Additional information

Additional information about this property:

- Cavity fill is recommended

## Smart meters

This property had **a smart meter for gas** when it was assessed.

Smart meters help you understand your energy use and how you could save money. They may help you access better energy deals.

[Find out about using your smart meter \(https://www.smartenergygb.org/using-your-smart-meter\)](https://www.smartenergygb.org/using-your-smart-meter)

## How this affects your energy bills

An average household would need to spend **£3,351 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £1,103 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2026** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

---

## Heating this property

Estimated energy needed in this property is:

- 24,296 kWh per year for heating
- 2,846 kWh per year for hot water

## Impact on the environment

This property's environmental impact rating is D. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

## Carbon emissions

<b>An average household produces</b>	6 tonnes of CO2
<b>This property produces</b>	6.7 tonnes of CO2
<b>This property's potential production</b>	5.0 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Steps you could take to save energy

► [Do I need to follow these steps in order?](#)

---

## Step 1: Cavity wall insulation

Typical installation cost	£900 - £1,500
Typical yearly saving	£257
Potential rating after completing step 1	59 D

## Step 2: Floor insulation (suspended floor)

Typical installation cost	£5,000 - £10,000
Typical yearly saving	£157
Potential rating after completing steps 1 and 2	61 D

## Step 3: Floor insulation (solid floor)

Typical installation cost	£5,000 - £10,000
Typical yearly saving	£114
Potential rating after completing steps 1 to 3	63 D

## Step 4: Condensing boiler (separate from the range cooker)

Typical installation cost	£2,200 - £3,500
Typical yearly saving	£575
Potential rating after completing steps 1 to 4	68 D

## Step 5: Solar photovoltaic panels, 2.5 kWp

Typical installation cost	£8,000 - £10,000
Typical yearly saving	£249
Potential rating after completing steps 1 to 5	71 C

## Advice on making energy saving improvements

## Help paying for energy saving improvements

You may be eligible for help with the cost of improvements:

- Insulation: [Great British Insulation Scheme](#)
- Heat pumps and biomass boilers: [Boiler Upgrade Scheme](#)
- Help from your energy supplier: [Energy Company Obligation](#)

## Who to contact about this certificate

### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	Ryan Kay
Telephone	07453269030
Email	<a href="mailto:r.g.kay82@gmail.com">r.g.kay82@gmail.com</a>

### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
Assessor's ID	EES/027115

---

**Telephone**

01455 883 250
