

# Energy performance certificate (EPC)

Mayhill Cottage  
London Road  
Addington  
WEST MALLING  
ME19 5AL

Energy rating

**E**

Valid until: **18 June 2033**

Certificate number: **0340-2781-5260-2797-8771**

## Property type

Detached house

## Total floor area

127 square metres

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

## Energy rating and score

This property's current energy rating is E. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

**Properties get a rating from A (best) to G (worst) and a score.** The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

### Breakdown of property's energy performance

## Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Sandstone or limestone, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Roof	Flat, limited insulation (assumed)	Very poor
Roof	Pitched, 75 mm loft insulation	Average
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good

Feature	Description	Rating
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in 76% of fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Secondary heating	Room heaters, electric	N/A

## Primary energy use

The primary energy use for this property per year is 314 kilowatt hours per square metre (kWh/m<sup>2</sup>).

▶ [About primary energy use](#)

## Additional information

Additional information about this property:

- Cavity fill is recommended
- Stone walls present, not insulated

### How this affects your energy bills

An average household would need to spend **£3,660 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £1,756 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

---

## Heating this property

Estimated energy needed in this property is:

- 21,943 kWh per year for heating
- 2,973 kWh per year for hot water

## Saving energy by installing insulation

Energy you could save:

- 557 kWh per year from loft insulation
- 1,483 kWh per year from cavity wall insulation
- 6,141 kWh per year from solid wall insulation

## More ways to save energy

[Find ways to save energy in your home.](#)

## Environmental impact of this property

This property's current environmental impact rating is E. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO<sub>2</sub>) they produce each year. CO<sub>2</sub> harms the environment.

## Carbon emissions

### An average household produces

6 tonnes of CO<sub>2</sub>

---

### This property produces

7.0 tonnes of CO<sub>2</sub>

---

### This property's potential production

2.5 tonnes of CO<sub>2</sub>

---

You could improve this property's CO<sub>2</sub> emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

## Changes you could make

► [Do I need to follow these steps in order?](#)

---

### Step 1: Increase loft insulation to 270 mm

Typical installation cost

£100 - £350

---

Typical yearly saving

£75

---

Potential rating after completing step 1

**51 E**

---

### Step 2: Flat roof or sloping ceiling insulation

Typical installation cost

£850 - £1,500

---

Typical yearly saving

£255

---

Potential rating after completing steps 1 and 2

**54 E**

---

### Step 3: Cavity wall insulation

Typical installation cost

£500 - £1,500

---

Typical yearly saving

£203

---

Potential rating after completing steps 1 to 3

**57 D**

---

## Step 4: Internal or external wall insulation

Typical installation cost

£4,000 - £14,000

---

Typical yearly saving

£856

---

Potential rating after completing steps 1 to 4

**68 D**

---

## Step 5: Floor insulation (solid floor)

Typical installation cost

£4,000 - £6,000

---

Typical yearly saving

£245

---

Potential rating after completing steps 1 to 5

**71 C**

---

## Step 6: Solar water heating

Typical installation cost

£4,000 - £6,000

---

Typical yearly saving

£122

---

Potential rating after completing steps 1 to 6

**72 C**

---

## Step 7: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

£3,500 - £5,500

---

## Typical yearly saving

£701

---

## Potential rating after completing steps 1 to 7

80 C

---

## Help paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/apply-boiler-upgrade-scheme\)](https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

### Who to contact about this certificate

## Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

### Assessor's name

Sean Goodman

---

### Telephone

07895079977

---

### Email

[hsurveys1@aol.com](mailto:hsurveys1@aol.com)

---

## Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

### Accreditation scheme

Elmhurst Energy Systems Ltd

---

### Assessor's ID

EES/007197

---

### Telephone

01455 883 250

---
